Dr. Seymour P. Halpert,
Syphilis Experimental Lab.,
U.S.P.H.S.,
School of Public Health,
Chapel Hill, No. Carolina.

Dear Dr. Halpert,

I would appreciate very much having reprints of your papers on antagonisms between enteric organisms. We have been obliged to pay attention to this phenomenon in the course of genetic work with coliforms and Salmonellae, where it has hindered recombination between strains.

Yours sincerely,

Joshua Lederberg
Assistant Professor of Genetics
